

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2   **MULTNOMAH COUNTY**

3       observed the vehicle Nancy Lee Crampton-Brophy was driving was a gray colored Toyota  
4       Sienna mini-van with a roof rack and tinted windows.

5  
6               Detective Beniga later told me Nancy Lee Crampton-Brophy gave the Glock 9mm  
7       handgun to them for safekeeping. The gun was found in its box without ammunition along with  
8       magazines and the slide zip-tied through the barrel.

9  
10              During this investigation a canvas for video surveillance was conducted of the  
11     surrounding businesses located by the Oregon Culinary Institute. This canvas is an investigative  
12     technique designed to locate and identify potential suspects, suspect transportation, and avenues  
13     of escape by the perpetrator. I had been informed by Detective Merrill that the Bellagio's Pizza  
14     restaurant located across the street from the Oregon Culinary Institute had a security surveillance  
15     system and had a camera that covered SW Jefferson Street just west of the Culinary Institute.

16  
17              While watching the video at the Bellagio's location I observed a dark colored minivan  
18     drive west bound on SW Jefferson Street from the area of the Oregon Culinary Institute. The  
19     vehicle looked just like the mini-van driven by Nancy Lee Crampton-Brophy. The time the mini-  
20     van travels west from the area of the institute was 0728 hours (AM) as adjusted from the  
21     surveillance system that was synced to Eastern Standard Time. The mini-van on the video  
22     appeared to be driven by a subject who had gray hair. As Detective Beniga was at the house of  
23     Nancy Lee Crampton-Brophy we asked him to take some pictures of her vehicle in order to  
24     compare it with the video. Detective Beniga told me when he was taking pictures of the mini-  
25     van; Nancy Lee Crampton-Brophy spontaneously stated, "Why? I wasn't there this morning, I  
26     was at home." I had observed Nancy Lee Crampton Brophy on the morning of June 2, 2018 and

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3   observed she had gray colored hair, fair skin, and was wearing dark colored clothing.  
4

5           The information developed from the crime scene and the autopsy conducted the  
6   following day determined the bullets involved in the shooting were 9mm in caliber and were  
7   fired by a semi-auto type handgun. The casings found at the crime scene were stamped "sig 9mm  
8   luger" with silver colored exteriors. I was also able to find from the Oregon Culinary Institute  
9   staff that Daniel Brophy had deactivated the alarm for the institute building at approximately  
10   0721 hours on June 2, 2018. From the information developed from the autopsy and the initial  
11   observance by the Medical Examiner Daniel Brophy was shot in the back once and shot in the  
12   chest once. Both bullet impacts were centrally oriented on his body and both bullets traversed the  
13   heart. Daniel Brophy did not have any defensive type wounds on his body. I noted no items or  
14   money appeared to have been taken from Daniel Brophy and no sign of a struggle or disturbance  
15   was present at the crime scene. Further, no items were found to be disturbed or missing from the  
16   Oregon Culinary Institute.  
17

18           During the initial investigation the cell phone belonging to Daniel Brophy the deceased  
19   victim was located on his person during the incident. The phone was seized as evidence and its  
20   information downloaded by Detectives in order to preserve the evidence. I personally reviewed  
21   the information on the phone in an attempt to discover possible motive and suspect information  
22   related to Daniel Brophy's murder. During the review I found a website book mark for the title  
23   "10 ways to cover up a murder." I later had contact with Nancy Brophy who confirmed she and  
24   Daniel Brophy had a shared Apple I-Tunes account for their phones. From my research into  
25   Apple's I-Tune family sharing plans, I know that internet searches and bookmarks are saved to  
26   the accounts search history and viewable from any phone attached to the account. I know from

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2   **MULTNOMAH COUNTY**

3   talking to Nancy Lee Crampton-Brophy she is a romance novelist and has several books  
4   published. I also know from my investigation and interview with Nancy Lee Crampton-Brophy  
5   she is involved with medical insurance counseling and is familiar with life insurance programs.  
6

7           I also took time to compare the surveillance video with the pictures of Nancy Lee  
8   Crampton-Brophy's mini-van. As I observed the photos I noted an older scratch with indentation  
9   of the driver's side rear quarter panel between the top of the rear wheel well and the fuel door.  
10   The scratch/indentation was rusted and had been on the vehicle for some period of time. As I was  
11   able to view the video with a better monitor, I could see the same deformation in the mini-van on  
12   the Bellagio's Pizza surveillance video. I could also see the driver's appearance was consistent to  
13   Nancy Lee Crampton-Brophy's appearance.  
14

15           After further canvassing I noted we were able to find additional video that pictured the  
16   same mini-van at the same time frames circling the area at 0708 hours. Located to the west of the  
17   Culinary Institute is a MAX platform called the Goose Hollow Station and has a series of camera  
18   systems. Detective Merrill and I were able to secure the platform video for this station from 0630  
19   hours to 0730 hours. Detective Merrill and I later reviewed these videos and were able to locate a  
20   van matching the description of the Toyota Sienna belonging to Nancy Lee Crampton-Brophy  
21   driving in towards the Oregon Culinary Institute at 0641 hours from the west. In one of the  
22   videos we were able to identify a portion of the license plate on the gray colored Toyota Sienna  
23   mini-van. The viewable digits are "67 B." I was not able to specifically identify the first digit and  
24   the last two digits listed on the license plate, but I was able to narrow what is seen into a range of  
25   possible digits. The first digit of the plate could be a "0," but it is not completely clear enough to  
26   be sure in my estimation. The other digits of the plate observed are consistent with "Q" and "X,"

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3   but could also possibly be a "D" and a "K." The license plate for the Toyota Sienna mini-van  
4   belonging to Nancy Lee Crampton-Brophy is assigned Oregon State License number "067  
5   BQX." I know from my own internet research that Toyota made the same body and light  
6   configuration for the Sienna mini-van for 2004 and 2005 models, and I know that the Toyota  
7   Sienna mini-van registered to Daniel Brophy match that model seen in the video surveillance I  
8   viewed. An Oregon DMV search indicates about 21 vehicles licensed in the State of Oregon to  
9   2004 and 2005 Toyota Sienna vans could fit this partial license plate combination.

10  
11       The other videos recovered and viewed were able to document a general area of travel for  
12   the mini-van. The van is seen arriving on SW Jefferson Street and SW 20<sup>th</sup> Avenue heading east  
13   towards the Oregon Culinary Institute at 0641 hours. The vehicle is seen heading north on SW  
14   18<sup>th</sup> Avenue. The van is later seen stopping in front of KGW Studios on SW Jefferson east of the  
15   Oregon Culinary Institute. The vehicle waits a short period of time then drives west by another  
16   camera located at 1734 SW Jefferson Street and continues west travelling by Bellagios  
17   Restaurant at 0708 hours. The van is then seen traversing the roundabout at SW Jefferson and  
18   SW 18<sup>th</sup> Avenue where it is encountered by a PGE video security camera located at SW  
19   Columbia Street and SW 16<sup>th</sup> Avenue. On this camera the mini-van turns left and drives north on  
20   SW 17<sup>th</sup> Avenue towards the Oregon Culinary Institute one block away. The vehicle is not seen  
21   driving by the other cameras until 0728 hours as it drives by Bellagios Restaurant again as it  
22   heads west towards Beaverton. The vehicle is also observed again at the Goose Hollow Tri-Met  
23   Station continuing west on NW Jefferson Street and out of view heading towards Beaverton  
24   Oregon. Based on the totality of this information I believe Nancy Lee Crampton-Brophy was  
25   circling the area in her dark colored mini-van prior to Daniel C. Brophy's arrival at the Oregon  
26   Culinary Institute, and Nancy Lee Crampton-Brophy was watching for Daniel C. Brophy's

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2   **MULTNOMAH COUNTY**

3 arrival in order to effect his eventual murder.  
4

5           It should be noted a court order/warrant was served on the AT&T account for the cell  
6 phone number of Nancy Lee Crampton-Brophy for the historical location information for the  
7 phone. The return of the warrant information requested is still being analyzed, but initial  
8 indication shows the phone located in the area of Nancy Lee Crampton-Brophy's residence in  
9 Beaverton Oregon during the time of the incident when Daniel Brophy was murdered. According  
10 to the initial analysis from the Detective Division crime analyst, Nancy Lee Crampton-Brophy's  
11 phone was not used but was on and connected to a nearby cell site.  
12

13           On June 5<sup>th</sup>, 2018, four days after Daniel Brophy's murder I received a call from Nancy  
14 Lee Crampton-Brophy inquiring as to a letter clearing her as a suspect in the death of her  
15 husband Daniel Brophy. During this investigation I have been contacted by four different  
16 insurance agencies and I have learned that Nancy Lee Crampton-Brophy is the beneficiary of  
17 these policies to an approximate value in excess of \$350,000.  
18

19           During this investigation I spoke to Nathaniel Stillwater the son of Daniel Brophy on  
20 June 27, 2018. During our conversation I learned Nancy Lee Crampton-Brophy used to sell life  
21 insurance. I also found Nathaniel Stillwater was unaware of the recent purchase of a handgun by  
22 Nancy Lee Crampton-Brophy. Nathaniel Stillwater told us he was surprised about the purchase  
23 of the gun, and thought it was odd as he did not know they were considering such a purchase.  
24 Nathaniel Stillwater told us he did not consider Nancy Lee Crampton-Brophy or his father to be  
25 the type of people to own a gun. Nathaniel Stillwater told us he is familiar with firearms and  
26 owns several firearms for hunting and sporting activities. Nathaniel Stillwater told us his father

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3   knew this about him, and he thought his father would have likely talked to him about such a  
4   purchase.

5  
6           Nancy Lee Crampton-Brophy told me she purchased the firearm at a gun show in  
7   February 2018, and she had not used the gun or had any ammunition to load into the firearm.  
8   When she gave the firearm to Detective Beniga she also provided a copy of the purchase receipt.  
9   The receipt listed J&B Firearm Sales as the vendor who sold the firearm to Nancy Lee  
10   Crampton-Brophy. I confirmed the serial number on the firearm matched that of the receipt. I  
11   went to J&B Firearms located at 10201SW Beaverton-Hillsdale Highway in Beaverton Oregon.  
12   I spoke with the employees there and they informed me that when they sell firearms at the gun  
13   shows they do not sell ammunition. The employees showed me the type of zip ties they use for  
14   securing weapons at the gun shows. I noted the zip tie used was similar to the one found on the  
15   gun Nancy Lee Crampton Brophy had turned over for safe keeping. While at J&B Firearms I  
16   noted they had the same type of ammunition for sale that was found in the crime scene. I also  
17   noted that J&B Firearms Store is located less than a mile away from Nancy Lee Crampton  
18   Brophy's home address.

19  
20           On August 29, 2018 I submitted an affidavit for a warrant to test and analyze the Glock  
21   17 firearm given to Detective Beniga and Detective Broughton for safe keeping by Nancy Lee  
22   Crampton Brophy. Multnomah County Circuit Court Judge Amy Holmes-Hehn issued a warrant  
23   to test and analyze the Glock 17 handgun with serial number [REDACTED] I transferred this firearm  
24   along with the two casings and bullets recovered from the crime scene to the Oregon State  
25   Criminal Laboratory on August 29, 2018. On September 4, 2018 I spoke to Leland Samuelson  
26   the forensic scientist and firearm expert who conducted the analysis of the handgun, casings, and

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2                                   **MULTNOMAH COUNTY**

3   bullets. Leland Samuelson told me the Glock 17 handgun with serial number [REDACTED] was not  
4   the gun that fired the bullets that killed Daniel Brophy. Leland Samuelson told me the gun used  
5   to shoot the ammunition components from the crime scene was most likely a different Glock  
6   handgun of 9mm caliber. Leland Samuelson confirmed the same gun was used to fire both  
7   bullets in the murder Daniel Brophy. I believe it to be more likely than not, given Nancy Lee  
8   Crampton-Brophy's experience, she understood that a lawfully purchased firearm is easily  
9   traced, and that she abandoned her plan to use the Glock firearm she had lawfully purchased. I  
10  also believe that it is more likely than not that Nancy Lee Crampton-Brophy purchased, or  
11  otherwise obtained, another firearm in order to carry out the murder. I believe it is more likely  
12  than not that Nancy Lee Crampton-Brophy conducted research online about the purchase of  
13  firearms and even visited websites where firearms can be purchased lawfully as well as through  
14  black market type transactions.

15  
16       On September 5, 2018 Portland Police Detectives served a search warrant on the  
17  residence and vehicle of Nancy Lee Crampton-Brophy at [REDACTED] Beaverton,  
18  Oregon. Prior to the search of the residence Nancy Lee Crampton Brophy was placed into  
19  custody and the Apple I-phone she was carrying was seized as evidence pursuant to the search  
20  warrant. During the search of the residence a purple colored Lexar thumb drive attached to the  
21  residential keys provided by Nancy Lee Crampton-Brophy was seized, a silver colored HP laptop  
22  computer with serial number [REDACTED] and a black and gray colored HP laptop computer  
23  with serial number [REDACTED] During the processing of documents found at the residence  
24  during the initial search of the residence, Sergeant Whattam found several more life insurance  
25  policies from eight different agencies. The amounts of coverage and who is covered under the  
26  policies is still being developed, and three of the agencies are part of what I had located earlier. I

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3    was told by Sergeant Whattam that some of the policies were opened the year 2012. Detective  
4    Merrill located a Garmin GPS mapping device in the gray colored Toyota Sienna mini-van with  
5    Oregon license plate 067BQX.  
6

7           On September 6, 2018 I was notified by Sergeant Burley he had been contacted by a  
8    reporter who had found an online writer's blog post called "See Jane Publish" where Nancy  
9    Brophy authored an article called "How to Murder Your Husband by Nancy Brophy." The article  
10   was published on November 4, 2011. I viewed this article and noted the number one motive for  
11   murdering your husband was "financial." Also, under the "Options to Consider" section in the  
12   article, "Guns" is listed as the first option. The opening paragraph to the article also states "I  
13   spend a lot of time thinking about murder and, consequently, about police procedure." (See  
14   attached article, EXHIBIT A) It is clear that Nancy Lee Crampton-Brophy has conducted  
15   research into the motives, planning, and concealing the crime of murder, and that research is  
16   likely to be found on her electronic devices.  
17

18   **Electronic Search:**  
19

20           I am requesting a warrant to search the following electronic devices for evidence of the  
21   crimes of Murder, as defined in Oregon Revised Statute 163.115, and Unlawful Use of a  
22   Weapon, as defined in Oregon Revised Statute 166.220, and to authorize the processing, testing,  
23   analyzing, comparing, and/or searching of this evidence by me and other Detectives with the  
24   Portland Police Bureau, Criminalists from the Portland Police Bureau Forensic Evidence  
25   Division and/or other Forensic Investigators with the Oregon State Police Criminal Laboratory,  
26   or any other sworn law enforcement agency within the State of Oregon: 1. An Apple I-phone

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2                                   **MULTNOMAH COUNTY**

3   belonging to Nancy Lee Crampton-Brophy, 2. a purple colored Lexar thumb drive, 3. a silver  
4   colored HP laptop computer with serial number [REDACTED] 4. a black and gray colored HP  
5   laptop computer with serial number [REDACTED] 5. A Garmin GPS mapping device;

6  
7           From my training and experience as a police detective along with conversations with  
8   other investigators I know that more likely than not persons involved in premeditated murder  
9   will conduct extensive research and planning in order to conduct and conceal their crime. This  
10   research includes internet searches with personal home computers, cell phones, and other  
11   electronic devices on how best to conduct a murder as well as how to avoid detection. I know  
12   from my training and experience investigating similar premeditated crimes that these internet  
13   searches can be bookmarked for future access providing evidence of intention and motive, I also  
14   know these internet searches will include inquiries into areas on how to flee apprehension, as  
15   well as ways to best benefit from the commission of the crime, such as insurance agency  
16   protocols and correspondence for payment of benefits from various policies and insurance  
17   agencies. I know this research and planning can be found on electronic devices such as  
18   computers, electronic devices, smart phones, and small memory storage devices. I further believe  
19   that it is more likely than not that this type of evidence will be located within the I-Phone  
20   belonging to Nancy Lee Crampton-Brophy as well as the Lexar thumb drive (a type of electronic  
21   device), and HP laptop computers seized pursuant to a previous search warrant, and because of  
22   the previously mentioned bookmark on the Brophy's shared iPhone account revealing a prior  
23   search for "10 ways to cover up a murder."

24  
25           Based upon this ongoing investigation I believe the planning of the murder of Daniel Brophy  
26   has been conducted sometime prior to the posted article of "How to Murder Your Husband" on

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2   **MULTNOMAH COUNTY**

3   November 4, 2011.

4  
5       *A. Type of Search*  
6

7           The type of search to be performed includes creating an “image” of the contents of the  
8 cell phone, computers and other electronic devices to be performed using forensic imaging tools  
9 that are appropriate to analyze these specific devices. An “image” of a device means that the tool  
10 used to conduct the analysis will attempt to copy an exact mirror copy of all data from the  
11 original device into a forensic copy; such copy can be later verified as a true and accurate copy  
12 of the contents for evidentiary purposes. The particular tools necessary to analyze the phone,  
13 computers and electronic devices cannot be reasonably ascertained at this time due to the fact  
14 that different tools work better or worse dependent on: (1) the type of phone, computer and  
15 electronic device, (2) the specific operating systems being used including operating system  
16 updates, and (3) ongoing updates to the tools themselves that improve their capabilities. The tool  
17 will capture all data possible on the devices and provide it to Law Enforcement as an “image” of  
18 the contents of the device. However, said tools and analysis do not include automatically using  
19 the device as a portal to access and download other information stored on internet based sources  
20 which are not stored locally on the device itself.  
21

22           Once the image and any report concerning the images is produced to your affiant, the  
23 search of that image for relevant evidentiary data will be limited to the terms of this warrant. The  
24 search of the device and its image will be limited to the types of evidence sought below;  
25 however, the court should be advised that modern electronic communications devices and  
26 computers store these types of information in any myriad number of file structures and databases

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3   and are often not segregated into discrete files that can be reasonably anticipated by your affiant  
4   prior to beginning the analysis.

5  
6       *B. Evidentiary Data Sought*  
7

8           I request the court authorize a warrant to search the data contained in the various  
9   electronic devices described herein, including the device's forensic image, for the following  
10   types of data:

11  
12       I.       Electronic Contacts  
13

14           Given my knowledge, training and experience described in this affidavit and with  
15   particularity that described within this section below, I request the court authorize a search of the  
16   Contacts stored on the phones, computers, and electronic devices and imaged copies of these  
17   devices.

18           Based on my training and experience, I know that persons who commit premeditated  
19   homicides will more likely than not use electronic devices, such as smart cell phones and  
20   computers or electronic storage devices, to plan their crimes, research their intended target,  
21   research how to evade detection, and coordinate with potential co-conspirators before, during,  
22   and after the crime. Based on my training and experience and conversations with other  
23   investigators contact information is important to understanding motive and purpose for  
24   premeditated murder as contact information can reveal secret affairs, secret monetary  
25   transactions, and illegal firearm purchases. Based on my training and experience, the stored  
26   contacts of the phone will, more likely than not, provide evidence of these crimes in the above

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3 described manner. Further, as described in the section entitled "Stored Communications" the  
4 contacts list will be necessary to understand to whom stored communications were sent and  
5 received. Additionally, it is not feasible to separate out the Contact list stored on a phone or  
6 computer or other electronic devices from the stored communications seizure since, based on my  
7 training and experience, I know that electronic devices will frequently cross-populate stored  
8 communications with stored contacts such that a text messages or calls received from a phone  
9 number known to the phone device or computer because such number has a corresponding  
10 contact, and will automatically display the contact information stored in the device.

11  
12           II.       Cell Phone Call history and call logs

13  
14           Given my knowledge, training and experience described in this affidavit and with  
15 particularity that described within this section below, I request the court authorize a search of the  
16 cell phone, and imaged copy of said phone, for call history and call logs on the cell phone  
17 created or modified from November 4, 2011 until the apprehension of Nancy Lee Crampton-  
18 Brophy on September 5, 2018.

19  
20           I know from my training and experience that persons with cell phones will, more likely  
21 than not, store phone numbers for persons under real names or nicknames and that, more likely  
22 than not, when a name and phone number are saved into a phone, they will come up on the caller  
23 identification automatically when the phone receives a call. I know from my training and  
24 experience that cell phones will preserve a call history for persons who call to or from the cell  
25 phone. This call history will display the associated real or nick name of the person called or  
26 calling along with the phone number called or calling. I know that this call log history and

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2   **MULTNOMAH COUNTY**

3   contact history can, more likely than not, provide evidence of possible co-conspirators to the  
4   crime and evidence concerning the location of evidence used in the crime, the contacts the  
5   suspect spoke to during and near the commission of the crime, establish or refute alibi's of the  
6   defendant, corroborate or dispute accounts of other witnesses including the suspect and provide  
7   evidence the defendant's motive and intent when committing the crime. Such communications  
8   can occur through voice phone calls recorded in the call history and call logs, stored voicemails,  
9   images and pictures sent between confederates, text messages or similar plain text  
10   communications, and email communications. I know from my training and experience  
11   investigating similar crimes that the call history and call logs providing evidence of the crime  
12   will, more likely than not, be found throughout the planning phase of the crime until the  
13   apprehension for the crime. Call logs and call history about the crime involving the plotting,  
14   planning and execution will, more likely than not, be found throughout the planning phase of the  
15   crime and through the date of the crime while call logs and call history after the crime involving  
16   discussions of the concealment of evidence linked to the crime, as well as discussions on escape,  
17   and avoiding apprehension, more likely than not, will be found until the eventual date of  
18   apprehension.

19  
20                   **III.     Stored electronic communications**

21  
22           Given my knowledge, training and experience described in this affidavit and with  
23   particularity that described within this section below, I request the court authorize a search of the  
24   phones, computers, and electronic devices and imaged copies of these devices, for stored  
25   communications on the cell phones, computers, and electronic devices and imaged copies of  
26   these devices created or modified from November 4, 2011 until the date of Nancy Lee

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2   **MULTNOMAH COUNTY**

3   Crampton-Brophy's apprehension on September 5, 2018.

4  
5           I know from my training and experience that cell phones, computers, and electronic  
6 devices can be used to store communications in a number of methods. The cell phones,  
7 computers, and electronic devices can store communications sent and received by text  
8 messaging, voice to text transcripts, voicemail, images, videos, and email communications. I  
9 know from my training and experience such stored communications include evidence prior to  
10 and during the execution of the crime such as planning, plotting and execution of the crime along  
11 with evidence that occurs after the commission of the crime such as the concealment of the crime  
12 as well as potential monetary proceeds from the commission of the crime.

13  
14           From my training and experience, I know that more likely than not persons involved in  
15 premeditated murder will conduct extensive research and planning in order to conduct and  
16 conceal their crime. This research includes internet searches, internet chat room communications,  
17 and social media messaging on how best to conduct a murder as well as how to avoid detection. I  
18 know from my training and experience investigating similar premeditated crimes that these  
19 searches can be saved and bookmarked for future access providing evidence of intention and  
20 motive, I also know these internet searches will include inquiries into areas in which to flee  
21 apprehension, as well as ways to best benefit from the commission of the crime, such as  
22 insurance agency protocols and correspondence for payment of benefits from various policies.

23  
24           The stored electronic communications on the cell phones, computers, and electronic  
25 devices and imaged copies of these devices involving the plotting, planning and execution will,  
26 more likely than not, be found throughout the planning phase of the crime and through the date

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**

2   **MULTNOMAH COUNTY**

3 of the crime while the stored electronic communications after the crime involving discussions of  
4 the concealment of evidence linked to the crime, as well as discussions on avoiding  
5 apprehension, more likely than not, will be found until the eventual date of apprehension of  
6 Nancy Lee Crampton Brophy on September 5, 2018.

7  
8                   IV.     Pictures, Videos, Audio files and other Media

9  
10               Given my knowledge, training and experience described in this affidavit and with  
11 particularity that described within this section below, I request the court authorize a search of the  
12 pictures, videos, audio files and other media on the cell phones, computers, and electronic  
13 devices and imaged copies of these devices, for said items created or modified from November  
14 4, 2011 until the apprehension of Nancy Lee Crampton-Brophy on September 5, 2018.

15  
16               I know from my training and experience that pictures, videos, audio files and other forms  
17 of electronically stored media collected out of the memory of cell phones, computers, and  
18 electronic devices can provide investigators with information that, more likely than not, provides  
19 evidence of the crimes described in this affidavit to include evidence prior to and during the  
20 execution of the crime such as planning, plotting and execution of the crime along with evidence  
21 that occurs after the commission of the crime such as the profits and concealment of the crime. I  
22 know from my training and experience that persons involved in the criminal acts described in  
23 this affidavit more often than not possess on their cell phones, computers and electronic devices  
24 photographs or videos showing themselves and the clothing they were wearing on a particular  
25 date and time and these photos often will have time stamps and GPS locations attached to them.  
26 Additionally, audio files can include voicemails left to and from other subjects such as

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3   confidants or love interests discussing the homicide and providing additional evidence of the  
4   motive, opportunity and plan of the incident. Further, based on my training and experience, I  
5   know that persons committing these criminal acts will, more likely than not, possess images or  
6   videos depicting the location of the crime such as pre surveillance for planning the criminal  
7   action. I know from my training and experience investigating similar crimes that these images,  
8   videos, audio files and media providing evidence of the crime will, more likely than not, be  
9   found throughout the planning phase of the crime until the date of apprehension. Images, videos,  
10   audio files and media about the crime involving the plotting, planning and execution will, more  
11   likely than not, be found throughout the planning phase of the crime and through the date of the  
12   crime while Images, videos, audio files and media after the crime involving discussions of the  
13   concealment of evidence linked to the crime and apprehension avoidance, more likely than not,  
14   will be found until the time of apprehension.

15  
16           V.       Internet history

17  
18       Given my knowledge, training and experience described in this affidavit and with  
19   particularity that described within this section below, I request the court authorize a search of the  
20   internet browsing history on the cellular phone, computers, and electronic devices seized from  
21   Nancy Lee Crampton-Brophy, and imaged copies of said cell phones, computers, and electronic  
22   devices, for said items created or modified from November 4, 2011 until the date of  
23   apprehension for Nancy Lee Crampton-Brophy on September 5, 2018.

24  
25       I know based on my training and experience that cell phones, computers, and electronic  
26   devices have the capability to browse the internet and such browsing history is stored within the

1                                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                                   **MULTNOMAH COUNTY**

3   memory of the cell phone, computer, electronic devices, and small memory storage devices  
4   attached to computers. I further know based on my training and experience that persons  
5   committing offenses described herein will, more likely than not, possess evidence of their  
6   criminal acts within their cell phone, computer, and electronic devices memory storage systems.  
7   I know from my training and experience the information stored in these electronic devices can be  
8   retained for long periods of time. Such evidence includes plotting, planning and execution of the  
9   crime such as researching the location of the crime, researching how to commit the crime  
10   including what weapons may be desirable to facilitate the crime and purchasing items and  
11   weapons from the internet to assist in the facilitation of the crime. Such evidence also includes  
12   apprehension avoidance and concealment of evidence after the crime. I know from my training  
13   and experience investigating similar crimes that internet browsing history providing evidence of  
14   the crime will, more likely than not, be found throughout the planning phase of the crime until  
15   the date of apprehension. Internet browsing history about the crime involving the plotting,  
16   planning and execution will, more likely than not, be found throughout the planning phase of the  
17   crime and through the date of the crime while internet browsing history after the crime involving  
18   discussions of the concealment of evidence linked to the crime and apprehension avoidance,  
19   more likely than not, will be found until the date of apprehension;

20  
21                   VI.     GPS Mapping  
22

23           I know based on my training and experience that automotive global positioning satellite  
24   systems (GPS) use satellite tracking technology to position the vehicles location on maps of  
25   areas and regions. I know these systems have memory logs and can store a history of entered  
26   positions and can also store pre-entered locations for future use in providing directions to those

1                   **IN THE CIRCUIT COURT OF THE STATE OF OREGON**  
2                   **MULTNOMAH COUNTY**

3    locations. As the unit uses a memory system to store this data it is possible to examine and recall  
4    the locations the unit has traversed.

5  
6           Based on the foregoing, I believe that probable cause exists for evidence of the crimes of  
7    Murder (ORS 163.115) and Unlawful Use of a Weapon (ORS 166.220), will be found inside;  
8    The cell phone of NANCY LEE CRAMPTON-BROPHY with assigned phone number [REDACTED]  
9    [REDACTED] along with the computers, and electronic devices;

10  
11          I know from training and experience that premature disclosure of the contents of this  
12    affidavit would jeopardize the investigation because it could release information known only to  
13    law enforcement investigators. This could allow information to be released that could otherwise  
14    be used to check the accuracy of information by witnesses and suspects related to this case.  
15    Based on the foregoing, I request the affidavit be sealed until further ordered by the court,  
16    excepting that it may be provided to the defense team in this case subject to the terms of any  
17    protective order currently governing discovery in the case.

IN THE CIRCUIT COURT OF THE STATE OF OREGON  
MULTNOMAH COUNTY

Therefore, based on the foregoing I pray for a warrant to search for evidence of crimes related to Murder (ORS 163.115) and Unlawful Use of a Weapon (ORS 166.220) to test, and examine, to include, but not limited to:

1. An Apple I-phone belonging to Nancy Lee Crampton-Brophy with assigned number [REDACTED]
2. A purple colored Lexar thumb drive,
3. A silver colored HP laptop computer with serial number [REDACTED]
4. A black and gray colored HP laptop computer with serial number [REDACTED]
5. A Garmin GPS mapping device

  
Affiant

SUBSCRIBED AND SWORN TO before me this 7<sup>th</sup> day of Sept 2018

  
Judge  
AMY HOLMES HEHN  
CIRCUIT COURT JUDGE

County of Multnomah

IN THE NAME OF THE STATE OF OREGON

TO ANY PEACE OFFICER IN THE STATE OF OREGON, GREETINGS:

You are hereby commanded to search for evidence of crimes related to Murder (ORS 163.115) and Unlawful Use of a Weapon (ORS 166.220) to test, and examine, to include, but not limited to:

1. An Apple I-phone belonging to Nancy Lee Crampton-Brophy with assigned number [REDACTED]
2. A purple colored Lexar thumb drive,
3. A silver colored HP laptop computer with serial number [REDACTED]
4. A black and gray colored HP laptop computer with serial number [REDACTED]
5. A Garmin GPS mapping device

And to seize and analyze the aforesaid objects of the search based upon the confines of the affidavit;

You are further directed to make return of this warrant to me within ten (10) days after the execution thereof.

It is further ordered pursuant to ORS 165.657 that the file in this cause be sealed until otherwise ordered by the court.

ISSUED over my hand on 9/7/18 at 1:37 a.m./p.m.

Amy Holmes Hehn  
Signature of Magistrate
